

## PURE EVIL MASKED AS A PANDEMIC

### MASS DELUSION

Perhaps you've heard the saying, "Truth is stranger than fiction." It is true especially in the context of a culture riddled with deception and fraud, living in a world of fake idols like in America today. If mass delusion could be metered, it would be registering high these days. And if delusion is evidence of separation from God, then America is far from God and has been for several generations for delusion and injustice is rampant in this land:

11. *And for this cause, God is sending to them a work of delusion for them to believe the deception:*
12. *That they all might be judged not believing the truth, but delighting in injustice.*

2 Thess. 2:11-12

Those who delight in injustice (lies) live in delusion. This is the way God's judgment works. It may be the reason people today trust in absurd, asinine ideas handed to them from a government that is as far from God.

But thank God that He preserves a remnant through Christ the Great Shepherd and keeps us in his protection. The plans of the devils and the propensities of the faithless, cannot prosper against us. We are God's children.

29. *My Father, which gave (the remnant) to me, is greater than all; and no man is able to pluck them out of my Father's hand.*

John 10:29

### UNEMPEACHABLE EXPERTS SPEAK

Regarding the fake pandemic, sound and sensible reason, and logic, has not totally disappeared in the world. There are still some folks who haven't abandoned their consciences completely. And some of them are speaking out in spite of the censors trying to silence them.

Michael Yeadon is a soft-spoken microbiologist in England. He is a former vice President and Chief Scientist for Allergy and Respiratory research at Pfizer - the vaccine company. He spent 32 years working for large pharmaceutical companies and is a leading expert in vaccines.

He is also a man on a mission, and his mission is to inform as many people as possible about the elite powerbrokers that have invented the fake pandemic as a smokescreen to conceal their real objectives. Here's Yeadon in a recent interview:

*"If you wanted to depopulate a significant portion of the world, and to do it in a way that wouldn't require destruction of the environment with nuclear weapons, or poisoning everyone with anthrax or something, and you wanted plausible deniability, whilst you had a multi-year infectious disease crisis, I don't think you could come up with a better plan than what is before us.*

*I can't say absolutely that is their motive, but I can't think of a benign explanation for why they are doing it."*

"Depopulation?" Yeadon has done extensive research on the matter, providing compelling evidence that such a diabolical objective may, in fact, be their goal.

Humans are capable of unimaginable viciousness and cruelty. Moreover, it is not for lack of proof that people may reject Yeadon's words, but for something more fundamental; the inability to grasp that men are capable of unimaginable viciousness and cruelty. Here's Yeadon again:

*"It's become absolutely clear to me, even when I talk to intelligent people, friends, acquaintances ... and they can tell I'm telling them something important, but they get to the point [where I say] 'your government is lying to you in a way that could lead to your death and that of your children,' and at that point their eyes glass over and they can't begin to engage with it.*

*And I think maybe a few can understand what I say, but most blank their understanding of it because it's too*

difficult. And my concern is, we are going to lose this, because people will not deal with the possibility that anyone is so evil.

*But I remind you of the many lies that made it possible to lead the people of Britain and America into wars, and what happened in Russia in the 20th century, what happened in 1933 to 1945, what happened in South-east Asia in some of the most awful times in the post-war era. And, what happened in China with Mao and so on ... We've only got to look back two or three generations. All around us there are people who are this bad and they are perpetrating this COVID debacle.*

*They're all around us. So, I say to folks, the only thing that really marks this one out, is its scale. But actually, this is probably less bloody, it's less personal, isn't it? The people who are steering this ... it's going to be much easier for them. They don't have to shoot anyone.*

*They don't have to beat someone to death with a baseball bat, or freeze them, starve them, make them work until they die. All of those things did happen two or three generations back ... That's how close we are. And all I'm saying is, some shifts like that are happening again, but now they are using molecular biology."*

## PEOPLE CAN'T IMAGINE ANYTHING SO DEMONIC

He's right, isn't he? Whereas many people know that the government, the media and the public health officials are lying to them about everything from the efficacy of masks, social distancing, and lockdowns, to the life-threatening dangers of experimental injections, they still refuse to believe that the people orchestrating this operation might be pushing them inexorably toward infertility and/or an early death.

So they stick their heads in the sand and pretend not to see what is going on right under their noses. It's called "denial" and they are helping to cover up the evil work of the puppet masters that are operating behind the scenes. Yeadon continues:

*"... In the last year I have realized that my government and its advisers are lying in the faces of the British people about everything to do with this coronavirus. Absolutely everything.*

*That lockdowns work, that masks have a protective value for you or someone else, and that variant viruses are scary things and we even need to close international borders because of these nasty foreign variants."*

Interviews and articles like this one usually appear on small websites. Why is that? Shouldn't the informed observations of a former Pfizer vice president appear on the front pages of The New York Times or The Washington Post? Wouldn't you expect the big cable news channels to run a hot-button interview like this as their headline story?

Of course not. No one expects that, because the media honchos reflexively quash any story that doesn't support the "official narrative," that is, that COVID is the most conta-

gious and lethal virus of all time, which requires a new authoritarian political response and the wholesale evisceration of civil liberties.

## NO ONE IS ALLOWED TO REFUTE THE OFFICIAL PROPAGANDA

Isn't that the underlying storyline of the last year? COVID skeptics and naysayers, like Yeadon, are not allowed to refute the official propaganda, or debate the issue on a public forum. They're effectively banned from the MSM and consigned to the outer reaches of the Internet where only a scattered few will read what they have to say.

Here's more:

*"Everything I am saying is demonstrably true. But our entire national policy is based on outrageous falsehood. But what I would like to do is talk about so-called "immune escape" because that is a big claim for this whole event.*

*There is no question in my mind that significant powerbrokers around the world have either planned to take advantage of the next pandemic or created the pandemic. The reason it must be true is that dozens and dozens of governments are all saying the same lies and doing the same things that cost lives."*

Let's pause for a minute, and ask ourselves why a modest, self-effacing microbiologist who operated in the shadows for his entire professional career has thrust himself into the limelight when he knows, for certain, he will be ridiculed, smeared, discredited, dragged through the mud or killed.

In fact, he openly admits that he fears for his safety and assumes that he could be "removed" ("assassinated") by his enemies. So, why is he doing this? Why is he risking life and limb to get the word out about this?

## A MORAL OBLIGATION

It's because he feels a moral obligation to warn people about the danger they face. Yeadon is not an attention-seeking narcissist. In fact, he'd rather vanish from public life altogether.

But he's not going to do that because he's selflessly committed to doing his duty by sounding the alarm about a malign strategy that may well lead to the suffering and death of literally millions of people. That's why he's doing it, because he's an honorable man and hasn't lost his sense of decency. Remember decency? Here's more:

*"Personally, all my instincts are shouting that it's a conspiracy, but as a scientist, I can't point to the smoking gun that says they made this up on purpose."*

Many of us who have followed events closely for the last year and have searched the internet for alternate points of view are equally convinced that it is a conspiracy. And while we might not have conclusive, rock-solid proof of criminal

activity, there is voluminous circumstantial evidence to support the claim.

By definition, a “conspiracy” is “an evil, unlawful, treacherous, or surreptitious plan formulated in secret by two or more persons.” What is taking place presently across the western world meets that basic definition.

Just as the contents of this article meet the basic definition of a “conspiracy theory,” which is an attempt to explain harmful or tragic events as the result of the actions of a small powerful group. This rejects the publically accepted narrative surrounding these events; indeed, the official version may be seen as further proof of the conspiracy. Yeadon continues:

*“I think the planned end game is, ‘everyone receives a vaccine’ ... Everyone on the planet is going to find themselves persuaded, cajoled, not quite mandated, hemmed-in to take a jab.*

*What they want is for every single individual on the planet to have a name or unique digital ID and a health status flag which will label you as being ‘vaccinated,’ or not. And whoever possesses that single central database, applicable everywhere, to control, to provide as it were, a privilege - you can cross this particular border (or not), or conduct this particular transaction (or not), depending on [what] the controllers of that one human-population database decide.*

*And I think that’s what this is all about because once you’ve got that, we become playthings and the world becomes what the controllers of that database want it.”*

## THE PATHWAY TO SOCIAL CONTROL

So mass vaccination is actually the pathway to social control by technocratic elites? Are we there yet? Pretty close, I’d say. Here’s more:

*“They are saying ‘We don’t want you to move around because of these pesky ‘variants’ — ‘but don’t worry, there will be ‘top-up’ (booster) vaccines that will cope with the ‘new deadlier variants.’ They’re all saying this when it is obviously nonsense.”*

Is he right? Is the variant hobgoblin now being invoked to prolong the restrictions, intensify the paranoia, and pave the way for endless rounds of mass injections? Judge for yourself, but here’s a sampling of articles that appeared in recent news that will help you decide:

### 1. Reuters — South African Variant Can ‘Break Through’ Pfizer Vaccine, Israeli study says.

“The coronavirus variant discovered in South Africa can ‘break through’ (i.e., overpower) Pfizer/BioNTech’s COVID-19 vaccine to some extent, a real-world data study in Israel found, though its prevalence in the country is low and the research has not been peer reviewed ...

We found a disproportionately higher rate of the South African variant among people vaccinated with a second dose, compared to the unvaccinated group. This South African variant is able, to some extent, to break through the

vaccine’s protection,” said Tel Aviv University’s Adi Stern. (So, according to the article — the vaccine doesn’t work - in fact it makes those vaccinated more susceptible.)

### 2. The New York Times — Rise of Variants in Europe Shows How Dangerous the Virus Can Be.

“Europe, the epicenter of the coronavirus pandemic last spring, has once again swelled with new cases which are inundating some local hospitals and driving a worrisome global surge of Covid-19.

But this time, the threat is different: The rise in new cases is being propelled by a coronavirus variant first seen in Britain and known as B.1.1.7. The variant is not only more contagious than last year’s virus, but also deadlier.

The variant is now spreading in at least 114 countries. Nowhere, though, are its devastating effects as visible as in Europe, where thousands are dying each day and countries’ already-battered economies are once again being hit by new restrictions on daily life ...

Vaccines will eventually defeat the variants, scientists say. But stringent restrictions are needed now to drive down cases of B.1.1.7.

‘We’ve seen in so many countries how quickly it can become dominant,’ said Lone Simonsen, a professor and director of the PandemiX Center at Roskilde University in Denmark. [So, the vaccines don’t work??] ...

‘And when it dominates, it takes so much more effort to maintain epidemic control than was needed with the old variant.’ [In other words, the vaccines don’t work.]

### 3. Cell — SARS-CoV-2 Variants B.1.351 and P.1 Escape From Neutralizing Antibodies

“... our findings indicate that the B.1.351 and P.1 variants might be able to spread in convalescent patients or BNT162b2-vaccinated individuals and thus constitute an elevated threat to human health.

Containment of these variants by non-pharmaceutical interventions is an important task.” [Note — In other words, the vaccines don’t work against the new COVID strains, so we might need to preserve the lockdown restrictions and masks forever.]”

How can people read this fearmongering bunkum and not see that it is a pack of sophomoric lies designed to terrify and manipulate weak-minded sheeplike people?

## “VARIANT” USED TO FUEL FEAR

There’s no denying that the variant fear is being used to fuel the COVID hysteria and perpetuate the repressive social restrictions. So, the question we should be asking ourselves is whether we can trust what we are being told by the media and the public health officials?

And the answer is “No!” we cannot trust them. They have repeatedly misled us on all manner of topics including masks, asymptomatic transmission, immunity, infection rate, fatality rate, social distancing and now variants.

The other question is - are these so-called variants more virulent? Well, it is unlikely because the data don’t seem to say so despite the scary headlines ... Pathogens tend to evolve (mutate) toward lower virulence, not higher.

Here’s more on the topic from diagnostic pathologist Dr.

Clare Craig, who provides a more technical explanation:

*“SARS-CoV-2 genetic sequence has ~30,000 letters. Alterations in a handful of letters will not change its shape much — if it did it wouldn’t function properly anyway. Fear mongering about ‘immune escape’ is not needed and is irresponsible especially when there is no evidence to support the claims.”*

In essence, Craig is saying the same thing we said earlier, that the slight changes to any infection will not impact the immune reaction of people who are already resistant or immune to the virus. Thus, the current crop of “variants” are no cause for alarm. If you already have prior immunity due to previous exposure to similar infections, (SARS, for example) any new strain is not a problem.

The mutations (variations) represent only the slightest change in the composition of the pathogen (less than 1%), which means that a vaccine is not needed.

## **MEDIA IS TWISTING SCIENCE TO TERRIFY THE PUBLIC**

Here’s a longer explanation that some readers might find overly technical and perhaps tedious, but it’s worth wading through in order to see that the media is deliberately twisting the science to terrify the public. This excerpt is from an article by Yeadon. Here’s what he said:

*“The idea is planted in people’s minds that this virus is mutating in such a way as to evade prior immunity. This is completely unfounded. It’s important to appreciate that upon infection, the human immune system cuts up an infectious agent into short pieces.*

*Each of these short pieces of protein are presented to other cells in the immune system, like an identity parade ... These have a range of functions. Some make antibodies & others are programmed to kill cells infected by the virus, recognized by displaying on their surface signals that tell the body that they’ve been invaded.*

*In almost all cases ... this natural smart adaptive immune system overcomes the infection. Crucially ... this event leaves you with many different kinds of long-lived ‘memory’ cells which, if you’re infected again, rapidly wipe out any attempt at reinfection.*

*So, you won’t again be made ill by the same virus, or by a similar replicate. The general ‘direction of travel’ (for viruses) is to become less virulent, eventually joining the other 40 or so viruses which cause what we collectively term ‘the common cold.’*

*What generally doesn’t happen is for mutants to become more virulent. But the key point I wanted to get across is just how large SARS-COV-2 is. I recall it’s of the order of 30,000 letters of genetic code which, when translated, make around 10,000 amino acids in several viral proteins.*

*Now you can see that the kinds of numbers of changes in the letters of the genetic code are truly tiny in comparison with the whole. So, 0.1% of the virus’s code*

*would be about 30 letters. A 30 letter change would leave 99.9% of that code the same, and therefore not any different from the so-called Wuhan strain. 0.1% change is not enough to fool your immune system.*

*Similarly, the changes in the protein translated from those letter code alterations are overwhelmed by the vast majority of the unchanged protein sequences. So your immune system, recognizing as it does perhaps dozens of short pieces ... will not be fooled by a couple of small changes to a tiny fraction of these.*

*... even if mutations did change a couple of these, the majority of the pieces ... of the mutated virus will still be unchanged & recognized by the immune system & a prompt, vigorous response will still protect you.”*

*No: your immune system knows immediately that this is an invader it’s seen before, and has no difficulty whatsoever in dealing with it swiftly & without symptoms. So, their variant theory is scientifically invalid ...*

## **WHY ARE PUBLIC HEALTH OFFICIALS AND THE MEDIA LYING?**

Let’s summarize: We have presented the informed views of three reputable scientists all of who explicitly refute the idea that the so called “variants” are “more lethal” and can “reinfect people.”

So, why are the public health officials and the media lying about this matter, which is fairly clear-cut and uncontroversial? That is the question.

Yeadon concludes that there is something flagrantly diabolical about their denial. He thinks they are lying in order to dupe more people into getting injected with a substance that will either render them infertile, cause them great bodily harm, or kill them outright. Take your pick. Here’s more:

*“The depopulation devils have got hold of the levers of power and this is a really artful way of getting you to line-up and voluntarily receive an injection that will damage you, make you infertile, or kill you.*

*It could be something that will produce normal pathology, it will be activated at various times between vaccination and the event, it will be plausibly deniable because there will be something else going on in the world at that time, in the context of which your demise, or that of your children will look normal.*

*That’s what I would do if I wanted to get rid of 90 or 95% of the world’s population. And I think that’s what they’re trying to do.”*

## **BUT THEY DON’T CONSIDER GOD**

Thankfully, these devils can not thwart God’s protection over his children. Their evil plans can work only upon those who believe in (worship) and trust the Beast System. What I am teaching is hopefully exposing the fact that the Beast System’s messengers cannot be trusted.

*Ben Williams*
